Office Action Summary	Application No. 10/541,281	Applicant(s) NIEUWENHUIS, GERRIT JAN	
	Examiner Luan K. Bui	Art Unit 3728	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 3728

1. Applicant's election of Group V, Figure 5 in the reply filed on 1/31/2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Applicant's indication that claims 1, 4, 6, 8 and 13 read on the elected embodiment of Figure 5 is noted. However, since claim 8 recites "at least one incision extends in a radial direction with respect to the circular opening" and claim 13 recites "at least one incision located at a minimum distance from the external circumference has a straight shape" and since the elected embodiment clearly has no such incision, claims 8 and 13 are deemed not to read on the elected embodiment. Claims 7-15 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Continued Prosecution Application

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/11/2007 has been entered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3728

4. Claims 1, 4 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, lines 10-12, the phrases “the opening” and “said opening” lack proper antecedent basis. In claim 1, the phrases "a number of punched openings" and "one or more openings" are confusion and indefinite because it is not clear whether “one or more openings” is the same as “a number of punched openings”. The phrases “the front flat foil bag portion” in claim 1, “the rearward flat foil bag portion” in claim 4 and “the front side folds” in claim 6 lack proper antecedent basis.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilfong, Jr. (4,995,860). Wilfong discloses in the embodiment of Figures 11-12, a foil bag (10, 11) comprising a flattened bag having a sealed bottom (17), a number of openings (20) in the vicinity of the upper edges of the foil bag to be unfolded with at least one opening located adjacent to the upper edge and having a diameter which is substantially equal or even greater than the external pin diameter (27) of the support and a front flat foil bag portion having an incision (21) between the upper edge and the at least one opening and the incision is an essentially straight continuous incision provided the upper edge to the opening.

Art Unit: 3728

As to claims 4 and 6, Wilfong further discloses a rearward flat foil bag portion has no incisions extending from the upper edge to the opening and a front side folds have openings and incisions similar to the front flat foil bag portion (Figure 12 and column 8, lines 8-15).

Response to Arguments

Applicant's arguments with respect to the pending claims have been considered but are deemed to be moot in view of the new grounds of rejection.
